## Multi-Scan Yarn Hairiness Meter

Laboratory tester with portable control module

Yarn Hairiness Distribution Plot

- Laboratory base unit with plug in control module/portable unit for patrol use.
- Multi Scan sensor measures all hair lengths simultaneously.
- Measures hair lengths from 1mm to 9>mm and produces full statistics.
- Built in printer lists test results and statistics.
- RS232 link for data transmission to a PC for further analysis.
- Yarn profile measurement software provided for the capture of yarn profile when used with a p.c.
- Software produces graphical analysis and distribution plots.
- Also use for filament/loop count and length.
- Portable measuring head supplied with specified gap setting. Range available is 1mm to 5mm in 0.1mm increments. Standard supply is 3mm gap.

Unplug the Control Module from the YHM4 base unit and use with Portable Sensor for patrol use
